# / Vehicle Hand Back Package

This package is designed to help you manage any potential costs associated with returning your car to your lease or finance company. It covers the most common items required by customers before the end of their contract. Additional services, if needed, will be quoted separately and agreed upon prior to any work commencing. This ensures that all rectification work can be completed in one place, to a consistently high standard.

## What is included with this package?

- 01 Removal of machine-correctable surface scratches on paintwork. Any scratches that cannot be corrected through machine polishing will be identified, and a quote for paintwork rectification will be provided (price on application).
- 02 Refurbishment of one alloy wheel, including both painted and diamond-turned finishes. This service excludes carbon wheels as well as wheels that are buckled or cracked.
- 03 Touch-up of stone chips on the paintwork to restore a cleaner, more uniform finish.
- 04 Removal of one dent to restore the vehicle's bodywork.

## Additional Services

Additional wheel refurbishments

Window chips

Smart repairs

Additional dent removal

Interior rips/tears

£495 +VAT
